Figure 1 displays two phylogenetic trees based on the maximum likelihood method. The left tree shows the relationships among 21 individuals, and the right tree shows the relationships among 21 individuals. The trees are rooted at the bottom. The individuals are listed on the left and right sides of the trees, with their names and affiliations. The trees are labeled with numbers 1 through 21. The trees are rooted at the bottom. The individuals are listed on the left and right sides of the trees, with their names and affiliations. The trees are labeled with numbers 1 through 21.
